International Web Technology Competition

WEB

International Web Tech. Competition

a) Theme

“Innovating for a Sustainable Future: Empowering Communities through Web Technology”

The International Web Technology Competition challenges students from higher education institutions around the world to develop innovative web-based solutions that address real-world problems while supporting the achievement of the **Sustainable Development Goals (SDGs)**. Participants are encouraged to transform creative ideas into impactful digital solutions that contribute to sustainable social, economic, educational, environmental, and technological development.

b) Description

1. Overview

The International Web Technology Competition is an international competition that challenges participants to design and develop innovative web-based solutions to address real-world problems and support sustainable development.

Participants are invited to transform ideas into functional, creative, and impactful web-based solutions aligned with one or more Sustainable Development Goals (SDGs). The proposed solutions may address challenges in various fields, including:

- Education
- Healthcare
- Environment
- Social Development
- Economic Empowerment
- Smart Communities
- Public Services
- Other areas relevant to sustainable development

The competition emphasizes not only technical excellence but also innovation, usability, accessibility, scalability, and the potential impact of the proposed solution on communities and society.

2. Objectives

The competition aims to:

- Encourage students to develop innovative web-based solutions that address real-world challenges.
- Promote creativity, critical thinking, collaboration, and technological innovation.
- Support the implementation of one or more Sustainable Development Goals (SDGs).
- Empower communities through accessible, inclusive, and impactful digital solutions.
- Foster international collaboration and knowledge exchange among students, educators, professionals, and young innovators.
- Inspire sustainable digital innovations that provide long-term benefits for society.

c) Syarat & Ketentuan

1. Participant Eligibility

- Open to active students from higher education institutions worldwide.
- Eligible participants are students enrolled in:
 - Bachelor's Degree (S1) or equivalent
 - Applied Bachelor's Degree (D4) or equivalent
 - Diploma 3 (D3) or equivalent
- Each team consists of 2–4 students.
- Team members must come from the same higher education institution, but may come from different study programs, faculties, or eligible education levels.
- Each team must be accompanied by one faculty advisor/lecturer from the same institution.
- One faculty advisor may supervise a maximum of five (5) teams.
- There is no limit on the number of participating teams from the same institution or country.
- Participation is institution-based, not country-based.
- A participant may only join one team.

2. Competition Rules

- Projects must be original and relevant to the competition theme.
- Projects must not be simultaneously submitted to another competition during this competition.

- Projects must not have previously won first place or become the main winner in another competition.
- Participants may use any programming language, framework, CMS, development tools, AI tools, libraries, APIs, or other technologies.
- Third-party resources must comply with applicable licenses and be properly acknowledged.
- Source code must be uploaded to a GitHub Repository.
- The repository must include:
- Source code
 - README
 - Installation/usage instructions (if applicable)
 - Technology stack
 - Technical documentation
- Participants are encouraged to provide a Live Demo.
- Projects requiring backend services or databases may use any suitable hosting platform.
- The organizing committee reserves the right to verify originality and disqualify teams violating the competition rules.

3. Submission Requirements

Each team must submit:

I. Project Proposal

Participants are not required to use a specific proposal template or format. Each team is free to design and present their proposal according to their own creativity and preferences, provided that all required information specified in the competition guidelines is included.

- Project title
- Team information
- Background
- Problem identification
- Proposed solution
- Project objectives
- Target users
- Main features
- SDGs alignment
- Innovation

- Potential impact
- Development methodology (if applicable)
- References

The project proposal must not exceed 15 pages, excluding the cover page and appendices. Participants may include additional supporting materials in the proposal appendix, such as:

- Project documentation
- Presentation materials
- Demonstration video links
- Other supporting materials

II. GitHub Repository

Repository must contain:

- Source code
- README
- Installation guide
- Technology information
- Technical documentation

III. Live Demo

Participants are encouraged to provide a live demonstration link.

IV. Submission Deadline

All required materials must be submitted no later than September 20, 2026 through the official submission system.

4. Grand Final

Selected finalists will participate in the Grand Final under the following conditions:

- Conducted fully online
- Presentation language: English
- Maximum 10 minutes presentation
- Maximum 5 minutes project demonstration
- Maximum 10 minutes Q&A session
- All team members must attend
- One team member delivers the presentation
- Any team member may answer judges' questions
- Presentation media is unrestricted (slides, videos, live demo, prototypes, etc.)
- Participants are responsible for their technical preparation and internet connection.

d) Rubrik Penilaian

1. Preliminary Evaluation

Criteria	Weight
Problem Identification and Relevance	15%
Innovation and Creativity	20%
Technical Implementation	25%
User Experience and Interface Design	15%
SDGs Alignment and Sustainable Impact	15%
Scalability and Sustainability	10%
Total	100%

Preliminary evaluation is based on the proposal, GitHub repository, live demo (if available), and supporting materials.

2. Final Evaluation

Criteria	Weight
Project Presentation	20%
Project Demonstration and Functionality	25%
Innovation and Problem-Solving	20%
SDGs Alignment and Potential Impact	15%
Response to Judges' Questions	15%
Teamwork and Professionalism	5%
Total	100%

The final evaluation is based on the project presentation, demonstration, question-and-answer session, and overall team performance.

e) Linimasa/ Timeline

Activity	Date
Competition Announcement & Promotion	August 1–7, 2026
Registration Period	August 10–31, 2026
Administrative Selection	September 1–10, 2026
Proposal & Project Submission	September 1–20, 2026
Project Evaluation	September 20–25, 2026
Finalist Announcement	September 27, 2026
Grand Final	September 27 – October 2, 2026
Announcement	October 3–4, 2026
Awarding Ceremony	October 6–9, 2026

International Web Technology Competition

Terms and Conditions of the Competition

- 1. Eligibility**
Active university students worldwide: S1/D4/D3 or equivalent.
- 2. Team Composition**
2–4 students from the same institution.
- 3. Faculty Advisor**
1 lecturer per team, maximum 5 teams per lecturer.
- 4. No Limit on Teams**
No limit on teams per institution or country.
- 5. Originality**
Project must be original and not a previous competition winner.
- 6. Technology**
Any web technology, framework, tools, or AI may be used.
- 7. Project Submission**
Submit Proposal + GitHub Repository + Live Demo.
- 8. Grand Final**
Fully online & English: 10-min presentation + 5-min demo + 10-min Q&A.
